BANKING

Type and level of studies: undergraduate professional studies Course: Banking Language of the studies: Serbian Status of the course: mandatory Semester: second year, semester three	
Language of the studies: Serbian Status of the course: mandatory	
Status of the course: mandatory	
Semester: second year semester three	
Senester. Second year, senester unce	
No. of ECTS credits: 7	
Requirement: Basics of Economics	

Objective of the course:

The objective of the course is acquisition of specific knowledge and skills in conducting banking operations and their application in practice. Upon the completion of the course students should be able to recognize differences between types of financial institutions and financial systems, to define and describe basic characteristics of the monetary function of banks, to define different forms of deposit potential and loan strategies. The objective of the course is that students possess a capability to differentiate among the characteristics of loan, interest, investment and off-balance sheet portfolios of a bank, to explain strategic performances in retail operations, as well as characteristics of bank balance sheet and income statement management strategy, and to be able to define main forms of the risks banks are exposed to.

Course outcome:

Upon the completion of the course students will be able to define different types of financial institutions, describe the role and importance of the central bank and business banks in the financial system of Serbia, understand the role of banks in the process of forming money supply and know the differences between mechanisms money in circulation regulation, define the main characteristics of bank deposit potential and loan extension strategies, describe main types of retail bank operations and to define basic principles of bank asset and liability management.

Course content:

Lectures

Introduction into banking; types of banks, types of bank services; banking, non-banking and intermediary financial institutions; comparative banking systems and monetary aggregates; strategy of raising and placing bank funs; strategic performances of a bank in retail and institutional operations; bank balance sheet performances; risk management (credit risk, interest rate risk, liquidity risk, foreign-exchange risk); financial derivatives (forwards, futures, swaps); best know banking systems in the country, region, EU and worldwide – comparative analysis; basic categories of international banking; international banking development factors; foreign currency, foreign-currency market and foreign-currency risk management; specific forms of international banking (euro banking, offshore banking, Islamic banking, Swiss banking); the structure of international banking and risks in international banking; international payment transactions.

Practical classes

Case studies; types of banks, types of banking services; banking, non-banking and intermediary financial institutions – group work; comparable banking systems – analysis; risk management (credit risk, interest rate risk, liquidity risk, foreign-exchange risk) – workshop; best known banking systems in the country, EU and worldwide – comparative analysis; internet search; visit to a bank.

BUSINESS INFORMATICS

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	undergraduate professional studies
Course:	Business Informatics
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	first year, semester two
No. of ECTS credits:	5
Requirement:	no requirement
Course objective:	
The objective of the cou	urse is acquisition of basic knowledge in the area of application of information-communication

technologies in business systems, familiarization with text processing software tools and computing programmes for tabular calculations in the respective field of student's activity; the objective of the course is acquisition of knowledge and practice in local and international modern programmes.

Course outcome:

Upon the completion of the course students will be able to apply the acquired knowledge on computer hardware, peripheral units, software tools, multimedia and internet in actual situations in business systems, i. e. to improve the work of an institution by applying the acquired knowledge. In addition to that, students should be able to use programmes for calculation or text processing that are among the most frequently used programmes (Word, Excel, Power Point), as well as modern local and international professional programmes (Hotelijer, Amadeus, Garson...)

Course content:

Lectures

Information technology and application in business systems; types of computers; the importance and types of computer networks; internet, intranet and extranet; most frequently used software in the profession; most frequently used computer languages (Word, Excel, Power Point, Axess); information systems; safety of computers and data protection; the importance of a continuous and timely uploading of data into a system; hardware; drive, server; networking; remote work; business correspondence; questionnaire, poll processing; graphic presentation and tabulating; types of errors in data processing; basics of telecommunications and form of telecommunication systems; local and international modern programmes of the profession (Hotelijer, Amadeur, Garson).

Practical classes

Work within IT system; need of continuous updating; basics of telecommunications and forms of telecommunication systems; the importance of a continuous and timely uploading of data into a system; work in the most frequently used programme in the profession; use of the internet; basic programme languages (Word, Excel, Power Point), work in programmes; questionnaire, poll processing; graphic presentation and tabulating; types of errors in data processing; use of a safety system; workshops and independently done tasks; local and international modern programmes of the profession (Hotelijer, Amadeus, Garson).

CASHIER AND ELECTRONIC OPERATIONS

Study programme:	Business Economics and Management, module: Financial Management and Banking			
Type and level of studies: undergraduate professional studies				
Course:	Cashier and Electronic Operations			
Language of the studies:	Serbian			
Status of the course:	mandatory			
Semester:	second year, semester four			
No. of ECTS credits:	8			
Requirement:	Banking			
Objective of the course:				

The objective of the course is familiarization of students with the importance, essence and way of functioning of cashier and electronic operations including ERP, CRM and SCM and their integration into electronic and internet business environment.

Course outcome:

Upon the successfully completed course students should have knowledge of a business concept based on on-line business and internet technologies.

Course content:

Lectures

Internet as a technical structure of contemporary e-business, e-commerce and e-marketing; comparison of the traditional and electronic business communication; key concepts of modern online business activities: CRM and SCM components; aspects of CRM and SCM technology, business applications ERP, CRM and SCM, CRM technologies and data; approaches to the implementation of e-business system: CRM, SCM etc.; specific programmes of cashier business in banks: calculating payments and disbursements for physical and legal persons, receiving and realization of transfer orders; balance checking, credit standing, bill of exchange registration and negotiation; registration of bank guarantee, report drawing up, account opening/closing; credit card issuing/cancelling; registration of a borrowing, borrowing repayment, registration and change of personal data, credit standing monitoring; bill check, work with foreign-currency, foreign-currency exchange; term deposits and term deposit cancellation; banking service presentation, dinar savings, foreign-currency savings; communication with clients at the bank counter, resolving conflicting situations; data confidentiality, security procedures; presentation of best known bank cashier programmes in Serbia.

Practical classes

Exercises are conducted in an IT laboratory with an aim of training students in practical use of information technology: internet services with a special emphasis on e-mail and WEB presentation for the purpose of doing business electronically: WEB sites with an integrated database enabling making consumer profiles, personalization and application of various analytical techniques; current web browsers; search techniques; independent practical work; project task (CRM, SCM); simulation in the IT laboratory; work with specific cashier business programmes in the banks in Serbia - calculating payments and disbursements for physical and legal persons, receiving and realization of transfer orders; balance checking, credit standing, bill of exchange registration and negotiation; registration of bank guarantee, report drawing up; account opening/closing; credit card issuing/cancelling; registration of a borrowing, borrowing repayment, registration and change of personal data, credit standing monitoring; bill check, work with foreign-currency, foreign-currency exchange; term deposits and term deposit cancellation; banking service presentation, dinar savings, foreign-currency savings - workshop; data confidentiality, security procedures - workshop, discussion.

DEGREE PAPER

Study programme:	Business Economics and Management, module: Financial Management and Banking			
Type and level of studies: undergraduate professional studies				
Course:	Degree Paper			
Language of the studies:	Serbian			
Status of the course:	mandatory			
Semester:	third year, semester six			
No. of ECTS credits:	5			
Requirement:	passed all year 1 to 3 exams			

Objective of the course:

The objective is to train students to apply basic, theoretical and methodological, specialist and specialist-applicative knowledge and methods in solving specific issues within a Degree Paper topic. Within the Degree Paper, students, examining the available literature or through work in an institution in which practice is conducted or by statistical analysis, deal with an issue, its structure and complexity and on the basis of the analyses made they draw conclusions on possible ways of its solving. Students are also trained in writing the Degree Paper, presenting it within the set deadline and discuss the Paper with specialists in the relevant area.

Course outcome:

On the basis of knowledge and skills acquired in the course of their studies, students are able to do the paper in a Teaching Base or to bibliographically collect specialist literature, write the paper and present it before the relevant board.

Course content:

Degree paper is a specialist or research work of a student in which the student familiarizes with the research methodology in all areas of importance for the relevant study programme and module. Paper topic may be experimental or bibliographical. Upon the conducted research, student prepares his/her degree paper in the form containing the following chapters: *Introduction, Theoretical part, Paper methodology, Results and discussion, Conclusion, Abbreviations* (optional), *Enclosures* (optional), *Literature, Candidate CV, Key documentation information* (data on the candidate to be used in the degree paper digitalization project in our country). The paper must consist of 40 pages as a minimum and 60 pages as a maximum.

Paper defence consists of oral presentation of the paper by the student, questions put by the paper defence board and student's answers. Elements of Degree Paper that are evaluated are:

 paper writing 	g
-----------------------------------	---

- maximum 20 points

paper subject matter

- maximum 30 points

- presentation within paper defence

- maximum 20 points
- answers to questions of three Examination Board Members maximum 30 points (3x10)

Paper Defence Board consists of 3 teachers, one of which is the mentor. Two of three teachers have to deal with the narrow specialist area the Degree Paper is about and the third has to be involved in a related area (interdisciplinary topics are an exception). Two of three members have to be teachers at ICEPS, and the third may be a teacher of other accredited higher-education institution in Serbia. One of three teachers may be retired. The mentor has to be a teacher at ICEPS.

Degree Paper may not be part of an already published scientific or specialist paper, but it may be part of a *future* paper (specialist paper, doctoral dissertation, scientific or review paper...).

Degree Paper may not be a copy or reworking of an existing article from the Internet or other electronic or printed literature or of an already published paper, which would be deemed plagiarism. Plagiarism in Degree Paper is strictly banned and it is sanctioned with its cancellation or more severe sanctions are applied.

Period of Degree Paper drawing up may not be significantly longer than planned (officially approximately 60 hours) including all its segments, from initial consultations with the mentor and examining the existing works (degree paper subject matter) through its writing, to its defence. The official period of degree paper defence is 30 min. as a maximum plus time during which Board members ask questions (additional maximum 30 minutes).

Literature:

Basic literature:

1. depends of Degree Paper topic

Supplementary literature:

2. depends of Degree Paper topic

Number of classes:

Lectures	Exercises	Other classes (professional practice)	Study research work (degree paper)	Other forms of classes (individual work with the student, project work, field work)
0	0	0	60	0

Types of classes: In the course of degree paper writing the mentor gives necesary instructions to the student, refers her/him to specific literature, assists in the selection of research methods and during analysis and processing of obtained results, as well as in making conclusions etc. In this period, student has additional consultations with the mentor and if required with other thechers involved in the area the degree paper topic is about. If the paper is written in an institution/firm, its consent is required.

Grade (maximum number of points 100):
Degree Paper grade is a total of points obtained for:
degree paper writing, 20 points;
degree paper subject matter, 30 points;

- degree paper presentation within its defence, 20 points; _

answers to questions of Degree Paper Defense Board members, 30 points (3 x 10, three Board members).

ENTERPRISE ECONOMICS

Study programme:	Business Economics and Management, module: Financial Management and Banking				
Type and level of studies	Type and level of studies: undergraduate professional studies				
Course:	Enterprise Economics				
Language of the studies:	Serbian				
Status of the course:	mandatory				
Semester:	second year, semester three				
No. of ECTS credits:	4				
Requirement:	Basics of Economics				
Objective of the courses					

Objective of the course:

The primary objective of the course is acquisition of theoretical and practical knowledge of all aspects of enterprise operations. In terms of theory, the objective is to understand the essence of the notion of enterprise, rules of its functioning and its relation with the surrounding. In terms of practice, the objective is acquisition of knowledge and skills as a precondition of successful enterprise management. The objective of the course is that upon the completion of studying process the student is able to define theoretical assumptions of enterprise economics, analyse legal and organizational aspects of the enterprise, apply cost management models, explain and analyse main economic principles and use specific examples, choose an adequate strategy of enterprise development.

Course outcome:

Upon the completion of the course Enterprise Economics students will be able to understand the purpose and objectives of an enterprise, its place and role in the socio-economic environment, to identify internal and external factors affecting consumption of production elements and operating costs, to identify relevant factors and mechanisms of enterprise product demand, analyse all phases of value adding in the reproduction process and elements and determinants of each of such phases, as well as to analyse factors affecting enterprise operating results and basic economic principles on the basis of which the success of enterprise operations is determined.

Course content:

Lectures

Theoretical basics of enterprise economics; economic, legal and organizational aspects of the enterprise and special types of enterprises; cost management; market, income, profit, competition; productivity; the principle of economics; cost-effectiveness; enterprise development strategy.

Practical classes

Case study analysis; analysis of fictitious cases – workshop; internet search (websites of enterprises); good practice analysis; a visit to a small and medium size enterprise, corporation; comparative analysis – workshop.

EXCHANGE OPERATIONS AND INVESTMENTS IN SECURITIES

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	undergraduate professional studies
Course:	Exchange Operations and Investments in Securities
Language of the studies:	Serbian
Status of the course:	elective
Semester:	third year, semester six
No. of ECTS credits:	5
Requirement:	Banking

Objective of the course:

The objective of the course is acquisition of knowledge and skills required for the field of stock exchanges and investments in securities. Students should know how to define the importance and role of stock exchanges, to define and describe the characteristics and purpose of underlying and derived securities, to see the difference between the exchange and over the counter market, to define the role of market indices and anticipate possible consequences of their movements, as well as to define investor protection mechanisms. Upon the completion of the course students should possess active knowledge and skills that will enable them to carry out activities and make right decisions within different segments of exchange operations and investments in securities.

Course outcome:

Upon the completion of the course students will be able to define different exchange participants, see the difference between financial instruments, analyse economic news and their impact on stock exchange movements, analyse financial reports. In addition to that, students will possess knowledge on how to make sound investments and will be able to analyse the possibilities of investor protection on the market.

Course content:

Lectures

Historical development and importance of exchanges; terms used in exchange operations; forward deals; main types of securities, other securities; financial derivatives; exchange intermediaries; stock market instruments; over-the-counter market; stock exchange securities listing; market indices; protection of stock exchange investor; stock exchanges in the country, EU, USA, worldwide – a comparative analysis; good practice, most frequent mistakes; latest stock exchange tools, programmes, software; new ideas in stock exchange operations, new currencies; stock exchange development trends; exchange operations over the internet; ways of investing and hedging.

Practical classes

Analysis of a local, regional, EU, US and global stock exchange – workshop; good practice, most frequent mistakes – workshop; stock exchange instruments – exercises; stock exchange indices – workshop; latest stock exchange tools, programmes, software, new ideas in stock exchange operation and new currencies – internet search; a visit to an institution involved in stock exchange activities; ways of investments in securities – simulation, workshop; case study – workshop.

FINANCIAL MARKETS AND INSTITUTIONS

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	undergraduate professional studies
Course:	Financial Markets and Institutions
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	third year, semester six
No. of ECTS credits:	4
Requirement:	Basics of Economics
Objective of the course:	

Objective of the course:

The objective of the course is acquisition of specific knowledge and skills required for financial markets and institutions and application of the acquired functional knowledge in practice. The objective of the course is acquisition of knowledge required for defining and describing the development, main characteristics, principles of functioning and national regulation of financial markets (mortgage, collateral, foreign-currency), spotting and analysing differences between the money market and capital market with a special focus on the analysis of differences between the mentioned market segments in developed countries and developing countries. In addition to that, the objective of the course is the ability of students upon the completion of the course to define market participants, describe and analyse money and capital market instruments.

Course outcome:

Upon the completion of the course students will be able to define the notion and describe main characteristics of modern financial markets, define characteristics of financial institutions doing business on financial markets, describe differences between basic segments of financial markets, differences between characteristics of money and capital markets, define main instruments of money and capital markets and characteristics of mortgage, collateral and foreign-currency markets.

Course content:

Lectures

The notion and development of financial markets; concepts of money and capital markets; main characteristics and functioning of financial markets; money market in countries in transition and developed market economies; market participants and money and capital market instruments; state regulation of financial markets; mortgage, collateral and foreign-currency market; international permanent capital market; international money market; theory of financial market efficiency; interest rates on financial markets; money market participants and instruments.

Practical classes

Discussions and analyses based on lectures, individual work, internet search, analysis of region-related cases; workshops.

MARKET RESEARCH AND DEVELOPMENT OF A BANKING PRODUCT

-	
Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	undergraduate professional studies
Course:	Market Research and Development of a Banking Product
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	third year, semester five
No. of ECTS credits:	5
Requirement:	Banking
Objective of the course:	

The objective of the course is acquisition of fundamental knowledge of the purpose of market research, its dimensions, multidisciplinarity, organization and ethical aspect of research and research process comprising a number of steps, from data gathering organization to drawing up report on research results. In addition to that, the objective of the course is acquisition of knowledge and skills relating to the banking product development process.

Course outcome:

Upon the successfully completed course students are expected to be able for further study and understand the market and marketing which would lead to successful acquisition of a number of business skills, such as communication, negotiation, sale, establishing relationship with consumers etc. The outcome of the course is also possession of knowledge and skills of banking product development process.

Course content:

Lectures

Introductory lecture, familiarization of students with the course and literature, teaching methods and exam taking; dimensions of market research; market research, market research multidisciplinarity; market research organization; ethical aspects of market research; defining the research problem and objectives; defining data sources; development of sampling strategy; selection of data collection methods; designing survey questionnaire and organization of primary data gathering; drawing up report on research results; use of research results as a basis for banking product design; the way of applicative reading the research results; the process and stages of banking product development; preparation of development proposal, method of presentation, valid points supporting the proposal; obtaining field (sales) feedback, the importance of communication of development and sales departments; realization of banking product development proposal, monitoring the process.

Practical classes

Market research - case study - actual and virtual - workshop, discussion; analysis of a specific market - project task, presentation, discussion; market research - banking product relationship - discussion; development of a specific banking product project task, presentation, discussion; importance of the communication between development and sales departments discussion; realization of banking product development proposal, monitoring the process – workshop, discussion.

METHODS OF ECONOMIC ANALYSES, ANALYSIS OF OPERATIONS AND BALANCE SHEET

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	: undergraduate professional studies
Course:	Metods of Economic Analyses, Analysis of Operations and Balance Sheet
Language of the studies:	Serbian
Status of the course:	elective
Semester:	second year, semester three
No. of ECTS credits:	5
Requirement:	Basics of Ecomomics
Objective of the course:	

The objective of the course is familiarization of students with basic categories and rules of market mechanism of different market structures and forms and their understanding of the model of choosing among alternatives and rational behaviour of market players motivated by personal interests, as well as to understand the mechanism and factors of determining balance prices in various forms of market and competition. In addition to that, the objective of the course is acquisition of theoretical and practical knowledge on the form, content, drawing up financial statements and their analysis aimed at appropriate business decision making.

Course outcome:

Upon the successfully completed course the outcome for the student should be the possession of knowledge of basic rules and principles of market functioning and thus of market economy as a whole. Upon the completion of a part of the course on methods of economic analyses, students will be trained to analyse and interpret the facts of enterprise relating to its yield, proprietary and financial standing, evaluate its creditworthiness and anticipate its business failure, understand the relevance of information based on the analysis of financial statements and use information from the statement for managerial purposes.

Course content:

Lectures

Principles, criteria and methodological characteristics of microeconomics; theories of consumer behaviour and demand theories (utility theories, consumer behaviour models, consumer's choice and demand; theories of corporate behaviour and supply theories (quotations, costs, income, profit maximization); production factors market: labour, capital, rent, profit; positions of microeconomic entities on markets of limited competitiveness; monopolists' market strategies, oligopolistic market, monopolistic competition etc.; modern microeconomic models of market behaviour of entities: game theory, externalities of theories of balance and welfare, market regulation etc.); methods and types of economic analyses; form and content of financial statements, relation of balance sheet and income statement; income statement preparation methods; classification and order of items in balance sheet and principles of balancing; balance-sheet item evaluation; types of statements; latent reserves and hidden losses; theory of financial statement analysis; form and content of financial statements; harmonization and standardization of financial statements;

Practical classes

Selection and analysis of financial statements in a given case study - workshop; analysis of an actual and fictitious enterprise in terms of its yield, assets and financial standing - workshop - evaluation of creditworthiness and anticipation of a business failure of an enterprise - analysis of a specific case; a visit to a bank, department of analytics and risk assessment.

MONETARY AND PUBLIC FINANCE

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	undergraduate professional studies
Course:	Monetary and Public Finance
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	second year, semester three
No. of ECTS credits:	5
Requirement:	no requirement
Objective of the course:	

Training students to understand the notion of money and its impact on economic trends, possession of a skill of interpreting monetary reports, training students to understand and interpret monetary measures and monetary policy instruments, possession of a skill of interpreting and evaluation of changes in money value; the objective of the course is acquisition of knowledge relating to functioning of public finance, importance of meeting liabilities and their impact on financial statements. Finally, the objective of the course is possession of a functional knowledge that will enable students to successfully solve specific tasks relating to the area of monetary and public finance.

Course outcome:

Upon the completion of the course students will have a command of terms in the area of monetary economics, they will be able to interpret monetary flows and interpret and apply regulations and provisions relating to monetary flows and changes in money value. In addition to that, students will be able to define ways how a state is funded, describe and analyse processes of tax calculation and payment by business entities, analyse taxing, tax planning and strategic management of entity operations, and to define and describe the tax system of Serbia and basics of the EU fiscal system.

Course content:

Lectures

Theoretical basics of modern money, monetary theory, financial system and financial markets, financial institutions, central bank, monetary policy, monetary policy implementation, monetary policy strategies, money supply and other monetary aggregates, demand for money, money and inflation, transmission mechanisms in monetary policy, international finance and monetary policy; the importance of the state in the economy and its relation with other economic sectors, relation between the amount of liabilities paid and the quantity of delivered public goods; tasks and functions of the state and public expenses; public revenues, their types, forms and subforms with an emphasis on certain tax forms; studying the budget and fiscal relations between different levels of authorities; specific features of public finance in Serbia, region, the EU - comparative analysis; specific features of public finance of countries in transition; EU requirements in the process of EU association and candidacy.

Practical classes

Analysis of cases from Serbia, region, EU and global practice; analysis of developments in the country – workshop, discussion; internet search, relevance of available data; a visit by a public finance analyst; a visit to an institution involved in public finance, discussion; problem simulation - workshop.

PRICE THEORIES

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies:	: undergraduate professional studies
Course:	Price Theories
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	second year, semester four
No. of ECTS credits:	6
Requirement:	Basics of Economics

Objective of the course:

The objective of the course is price formation in market economy whereby a special focus is on the market mechanism leading through supply and demand relation to economic equilibrium. Application of the knowledge acquired in this course will enable students to solve actual economic issues in a modern and efficient way.

Course outcome:

Upon the successfully completed course students are expected to possess knowledge that will enable them to understand other complex economic issues. Upon the completion of the course students will be able to understand actual economic developments and apply the acquired theoretical knowledge in practice.

Course content:

Lectures

Introduction into the notion of price theory; types of theories, dependence on the economy of the country, economic state, target group; supply, demand, economic equilibrium, branches of economy and enterprises; market classification and characteristics: perfect competition, monopoly, price discrimination, oligopoly; monopolistic markets; state intervention in the domain of prices; overall economic equilibrium, welfare economics; price theories in banking services; price theories in tourism; price selection; the notion of a "cheap product", "average price", "expensive product" – consumer target groups, possibilities of application depending on the type of product; method of sale of products of different prices, sales techniques. *Practical classes*

Discussion on teaching units taught in lectures; price formation of a selected product – project task, workshop, discussion; the notion of a "cheap product", "average price", "expensive product" – workshop, discussion; method of sale of products of different prices, sales techniques - workshop; a visit of a bank development department employee.

PROFESSIONAL PRACTICE 1, 2, 3

Study programme:	Business Economics and Management, module: Financial Management and Banking
Type and level of studies	: undergraduate professional studies
Course:	Professional Practice 1, Professional Practice 2, Professional Practice 3
Language of the studies:	Serbian
Status of the course:	mandatory
Semester:	Professional Practice 1: first year, semester two
	Professional Practice 2: second year, semester four
	Professional Practice 3: third year, semester six
No. of ECTS credits:	4+4+4
Requirement:	no requirement

Objective of the course:

The objective of the course is familiarization of students with the basic economic, managerial and informatics issues encountered in practice; the way students recognize the topic dealt with during studies and acquire knowledge on the application of the learnt methods they are encouraged to study further or to repeat and supplement their knowledge.

Course outcome:

Upon the successfully completed course students should have a practical knowledge, they are capable of further studies and better prepared for their future work in business organization.

Course content:

Having met the requirements (attending all lectures and passed all mandatory exams in the current school year and passed all elective exams in the previous school year) students may do a professional practice in some of Teaching Bases – an institution or business organization. Namely, the School has agreement on collaboration with several Teaching Bases (legal persons – business organizations). In case the student herself/himself proposes the Institution, the School is obliged to sign an agreement with that Institution on business and technical collaboration to determine supervisors of practical work in the Teaching Base. The student conducts practice in a company whose **core activity corresponds to the study programme and module the student attends**.

Professional Practice Coordinator is a professional employed with and institution (Teaching Base) in which professional practice is conducted and with whom the School signs a contract on additional work requiring student supervision, assistance and education and eventually grading student's work. This professional is required to have at least a higher professional school degree.

Professional Practice Mentor is a School teacher in the area (course) in which professional practice is conducted.

At the beginning of professional practice a special attention is given to institution rules defining its operations, as well as to other documents, and to production and service provision organization, tracking and recording its activities in the decision-making process. The student works in several units and familiarizes with the work of several jobs, as defined in the professional practice referral submitted by the School to the Teaching Base. After that the student gets involved in activities in accordance with his/her study programme and that is deemed to be student's professional work.

Professional practice roughly evolves as follows:

- Professional practice 1: familiarization with the work environment, duties of employees, manner in which the organization functions and discharging less demanding tasks during practice;
- Professional practice 2: inclusion in the work of organization/institution against permanent supervision of the mentor
- Professional practice 3: the mentor is present, but student carries out the assigned duties on his/her own.

Upon the completion of professional practice, the Institution issues a report on professional practice bearing the signature and stamp of its director and submits it to the head of the School - i. e. the Teaching Base issues a certificate of completed professional practice of the student. Data on the completed professional practice are recorded in student's file, student's booklet and his/her diploma.

When creating the report on student's professional practice, the mentor evaluates:

- student's activity
- student's theoretical knowledge
- student's practical work

Professional practice of students is conducted in several Teaching Bases with which the School has signed the agreement on collaboration. The School selects professional employees of Teaching Bases as professional practice supervisors who, together with course teachers, take care of the quality of Professional Practice (requirements for the selection of professional associates is the formal education of the same or higher level than the higher school (180 ECTS credits) as well as other requirements needed for conferring the respective title in accordance with the Rules on Conferring the Title of Teacher of Assistant Teacher).

For the study programme requiring Teaching Bases are tourist and hospitality facilities: hotels of different categories, restaurants, wine cellars, baths, resorts, tourist agencies etc.

Literature:

Basic literature:

- 2. literature depending on the type of Teaching Base and work student is to do
- 3. organizational documents of the Teaching Base (statute, rulebooks...)

Types of classes:

Interactive classes, demonstration, practical exercises, analysis of examples from practice, case studies, discussion, e-learning			
Knowledge grading (maximum No. of points 100)			
Pre-exam obligations	Points	Degree exam	Points
Lecture attendance	3	exam	40
Activity	7		
Project/semina paper	0		
Exercises/professional practice	20		
Colloqua/exam	30		

PROTECTION OF DATA AND COMPUTER SYSTEMS

Study programme: Business Economics and Management, module: Financial Management and Banking Type and level of studies: undergraduate professional studies Course: Protection of Data and Computer Systems Language of the studies: Serbian Status of the course: elective Semester: first year, semester one No. of ECTS credits: 5 Requirement: no requirements Objective of the course: Acquisition of knowledge of theoretical basics of protection of data and computer systems. Familiarization with possible and attacks, primarily within the Internet environment. Familiarization with the tools used in detecting vulnerability of st the-art systems and application of preventive protection. Knowledge of basic techniques and technologies of protection and computer systems. Course outcome: An increased level of resistance to possible threats and attacks. Course content: Lectures Introduction into basics of protection of data and computer systems; classification of security threats; analysis of att methods; mechanisms of system resources access control; protection models; physical protection; hardware protection; application protection; protection of electronic payment systems. Practical classes Practical classes orrespond to the timetable of lectures and they comprise: methods of social engineering; risk mana, methods; phishing methods; examples of viruses and antivirus software; examples of a Trojan Horse; examples of a co worm; Kerberos; examples of application of cryptogr	tacker's n; basic ; IPsec; agement omputer
Course: Protection of Data and Computer Systems Language of the studies: Serbian Status of the course: elective Semester: first year, semester one No. of ECTS credits: 5 Requirement: no requirements Objective of the course: Acquisition of knowledge of theoretical basics of protection of data and computer systems. Familiarization with possible and attacks, primarily within the Internet environment. Familiarization with the tools used in detecting vulnerability of si the-art systems and application of preventive protection. Knowledge of basic techniques and technologies of protection and computer systems. Course outcome: An increased level of resistance to possible threats and attacks. Course content: Lectures Introduction into basics of protection of data and computer systems; classification of security threats; analysis of att methods; mechanisms of system resources access control; protection models; physical protection; hardware protection; application protection; protection of electronic payment systems. Practical classes Practical classes correspond to the timetable of lectures and they comprise: methods of social engineering; risk mana, methods; phishing methods; examples of viruses and antivirus software; examples of a Trojan Horse; examples of a co worm; Kerberos; examples of application of cryptographic services; examples of digital signature use; authentication me PKI; application of security barriers. Literature:	tacker's n; basic ; IPsec; agement omputer

RETAIL AND COMMERCIAL LOANS, COLLATERAL EVALUATION

Study programme:	Business Economics and Management, module: Financial Management and Banking		
Type and level of studies: undergraduate professional studies			
Course:	Retail and Commercial Loans, Collateral Evaluation		
Language of the studies:	Serbian		
Status of the course:	mandatory		
Semester:	second year, semester four		
No. of ECTS credits:	6		
Requirement:	Banking		
Objective of the course:			

The objective of the course is familiarization of students with basic organizational forms and broadest spectrum of activities of present-day commercial banks regarding loan extension as a banking service, different types of loans and investments of commercial banks, the notion of deposit, capital structure, asset and liability management, portfolio management, as well as familiarization with modern financial instruments – financial derivatives, and understanding their role in portfolio management on the local and international money and capital market.

Course outcome:

Upon the successfully completed course students will be familiarized with the spectrum of activities of commercial banks regarding retail loans, corporate financial reports, possibility of reviewing non-financial reports on client operations based on soft/hard facts for the purpose of evaluating client's creditworthiness. Students will be prepared to understand complex relations in different segments of financial markets and to create by using adequate financial tools, techniques, strategies and simulation method, an optimum portfolio of a commercial bank.

Course content:

Lectures

Organization and structure of a modern commercial banking; financial reports of commercial banks; indicators of successful operations of commercial banks; types of activities in present-day commercial banking: criteria, classifications; commercial bank funds source management: deposit and non-deposit sources and capital; investment portfolio management in investment banking; organization and management of retail operations: consumer credits, credit cards, immovable property loans and commission operations; types of loans; creditworthiness; ways of calculating creditworthiness; ways of communication with clients regarding presenting loans as a banking service and creditworthiness; collateral options; credit payment transactions; instruments of international payment transactions in commercial banking and loan provision process.

Practical classes

Analysis of actual and fictitious cases – workshop, discussion; calculating creditworthiness – workshop, presentation, discussion; ways of communication with clients regarding presenting loans as a banking service and creditworthiness – workshop, presentation; credit payment transactions – exercises; a visit to a commercial bank, creditworthiness review department; a visit by a bank employee involved in loan provision.

RISK MANAGEMENT

Study programme:	Business Economics and Management, module: Financial Management and Banking		
Type and level of studies: undergraduate professional studies			
Course:	Risk Management		
Language of the studies:	Serbian		
Status of the course:	mandatory		
Semester:	third year, semester six		
No. of ECTS credits:	5		
Requirement:	Banking		

Objective of the course:

The objective of the course is to train students in adequate selection of risk avoidance and transfer strategies, making appropriate assessment of a risk of certain activity, risk assessment presentation, process managing and modification aimed at risk neutralization or minimization, as well as in applying principles of sound management and good business relations.

Course outcome:

Upon the successfully completed course students will possess knowledge in different risks with a special emphasis on market and financial risk. Students will also acquire knowledge in risk assessment and taking adequate steps aimed at neutralization or minimization of risk of a certain activity.

Course content:

Lectures

The notion and necessity of risk management; risk elements, risk calssification, risk factors; risk management strategies; risk management process, risk management principles; controlling aimed at risk management; enterprise risk management; general principles of enterprise risk management; enterprise risk management; risk identification and description; risk analysis, quantitative analysis, qualitative analysis; risk response determining; risk monitoring and reviewing; risk reporting; risk consultations, confidentiality of data, protection from panic; risk communication.

Practical classes

Repetition and discussion on topics dealt with in lectures – discussion; risk analysis, quantitative analysis, qualitative analysis – project task, presentation, discussion; risk monitoring and reviewing – workshop; risk reporting – workshop; risk consultations, confidentiality of data, protection from panic – discussion; risk communication – workshop, discussion.

SOCIAL NETWORKS

Study programme:	Business Economics and Management, module: Financial Management and Banking		
Type and level of studies: undergraduate professional studies			
Course:	Social Networks		
Language of the studies:	Serbian		
Status of the course:	elective		
Semester:	second year, semester four		
No. of ECTS credits:	5		
Requirement:	no requirements		
Objective of the course:			

Objective of the course:

The objective of the course is to familiarize students with all good (and adverse) aspects of use of social networks for business purposes, with types of their application in marketing, as well as with the perspectives of business development worldwide. In addition to that, the objective of the course is familiarization of students with the concepts and technological infrastructure of social networks, ways of data analysis on social networks.

Course outcome:

Upon the completion of the course, students will possess knowledge of types of social networks, the good and bad sides of their use for business purposes, possibilities of their use in marketing, as well as perspectives of business development worldwide, ways of research, collecting and analysing data obtained on social networks and using them in attitude development and forming.

Course content:

Lectures

Introduction into social networks; web evolution: Web 1.0, Web 2.0 and Web 3.0; classification and characteristics of social networks; analysis of social networks using graph theory; identity management on social networks; software environment in internet community forming; Web 2.0 technologies; interactive web: Ajax and API; Web 2.0 technologies: P2P, web services, SOA. RSS, REST, JSON, mashups; social fora, Chat, IM; publishing: blogs and Wikis, Wikipedia; exchange of digital contents; recommendation systems, confidence and reputation development mechanisms; possibilities of use of social networks in marketing, possibilities of abuse; use of social networks as sales tools; modern trends of social networks, perspectives; social network data research and analysis; protection of privacy on social networks.

Practical classes

Practical work is adapted to the content and timetable of theory part: analysis of case studies; independent work in the analysis of an actual case; giving independent content proposals on social networks of an imaginary business project; possibilities and use of social networks in marketing, possibilities of abuse, ethical issues - discussion; research and analysis of data obtained on social networks - analysis of examples encountered in practice.
